Allen Introduces the New AW21 Wheel Buggy

April Thu, 2020
Published In Concrete Equipment News

Paragould, Arkansas USA - Allen a leader in professional quality concrete placement and finishing equipment, announced the debut of their newest wheel buggy. The AW21 is an electric start and allows the operator to place materials with precision.

The AW21 is the newest buggy in the Allen lineup. It is equipped with a large 21 cubic foot bucket that allows the operator to transport a payload of 3,200 pounds.

AW21 standard features include:

- 20.5hp Kohler CH640 gasoline engine
- Travels speeds up to 5.9 mph for greater job site efficiency
- Foam filled tires
- Solid 2” thick steel frame
- Forklift pockets for easy transportation

Allen Engineering Corporation (AEC) is headquartered in Paragould, Arkansas USA. The company designs, engineers, manufactures and markets concrete and related equipment with a number one goal of Total Customer Satisfaction.
