Published In Newsletters

Brett Mangrum has been with AEC nearly three years working in our Assembly department. Brett has had a hand in building many different pieces of Allen equipment, everything from screeds to walk behind trowels to wheel and track buggies, in his time with AEC.

Brett has been in the Paragould area for most of his life and attended Greene County Tech. He is married, has two girls, five and three, and takes great pride in coaching his daughter's soccer team.

When asked what Brett liked the most about working with Allen Engineering, his answer was simple. He appreciates the flexibility AEC provides and is thankful that we allow him to do a job and do it well. Brett is one of the many associates AEC employs, and his work here is highly valued.
