Allen International Master Distributor ANCON Beton works hard to grow the knowledge base of concrete contractors around Southeast Asia and Australia.

In April 2016, ANCON Beton via its dealer, PT Atlas Pacific International, helped an Indonesian company, PT Glitter, learn how to achieve high quality flat floors. Ancon took a team along with a complete set of Allen equipment to Indonesia to help them achieve this goal.

The training was a combination of class room lessons and a lot of time on the job site. They used Allen Razorback Truss Screed, two Pro 446 Walk Behind Trowels, two MSP 445 Ride on Trowels and

a variety of hand tools.

PT Glitter is extremely satisfied with their acquired knowledge and new machines.They look forward to showing their customers what they can now achieve with the support ANCON and Allen equipment.

For More information on Ancon Beton or Atlas Pacific, view their website.
