Pro446X

The Pro446X is the newest walk-behind trowel in the Allen lineup and is equipped with a variable torque converter clutch, allowing for low-speed torque and high-speed finishing. The plow handle design puts the operator at ease when pitching the blades to an all-new height.

E-Screed by Magic Screed®

The new E-Screed is fast and easy to use, and its high-frequency screed vibration provides uniform distribution over the entire blade length - enhancing the structural integrity of the concrete through consolidation.
