Published In Newsletters

Lorena Mooneyhan, known affectionately as “Tootie”, has been with AEC in our Logistics Department for just over four years. Tootie is key to the success of Allen, helping to ensure that materials for the parts warehouse are purchased, service parts are boxed for orders, and small package shipments are prepared on a regular basis.

Tootie and her dogs Annie and Luna live in the Marmaduke, Ark. area. She enjoys spending her free time on the beautiful Spring River, caring for her dogs, and bowling with a group of colleagues.

When asked what Tootie liked the most about working at Allen Engineering, her answer was simple, she appreciates the close-knit, family atmosphere here at Allen.

We love Tootie and everything she does, but we are particularly grateful for her upbeat attitude and contagious energy. Her optimistic attitude brightens her colleagues' days and makes Allen Engineering a wonderful place to work.
