## MSP475

The MSP475 is designed with the high volume flatwork concrete contractor in mind. This rider is mechanically-driven, eight-foot class ride-on power trowel. It comes with a powerful 57 hp Kubota liquid-cooled gasoline engine that keeps this machine running cooler, digital readouts for accurate fuel levels and diagnostics, and a large fuel tank for longer run times. This rider produces excellent torque even at high rotor speeds, which makes it excellent for panning or finishing operations.

# STEEL FLOAT PANS

Allen Engineering pioneered the use of floating discs (or pans) on riding trowels in 1989 and Allen® Pans remain today the finisher's choice when high FF Numbers are specified on a concrete floor. Allen's flat pan tolerances cut bumps and fill low spots in the concrete floor. Insist on Allen® Steel Pans for your Allen Riders and Walk-Behinds. Made to the same exacting tolerances as the trowels themselves, nothing finishes better.
