MSP465

The new MSP465 was redesigned with the high-volume flatwork concrete contractor in mind. The new MSP465 comes equipped with assisted steering, reducing operator fatigue. It comes with a powerful 57 hp Kubota liquid-cooled gasoline engine that keeps this machine running cooler, and a 10-gallon fuel tank for longer run times. This rider produces excellent torque even at high rotor speeds, which makes it excellent for panning or finishing operations.

The centrally located grease port allows for ease of maintenance.

The spray button has been relocated to the foot pedal for contractor convenience.
